<head>
    <meta charset="UTF-8">
    <meta http-equiv="X-UA-Compatible" content="IE=edge">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Document</title>
    <script src="event.js" defer></script>
</head>
<body>
    <h1>This number will increase</h1>
    <input id="numb">
    <button type="button" onclick="myFunction()">+1</button>
</body>
</html>
```

Javascript

```javascript
console.log("events.js is running...");
function myFunction(){
    let value, text, inputObject;
    //Get the value of the input field with id"numb"
    inputObject = document.getElementById("numb");
    value=parseFloat(inputObject.value);

    //if x is not a number
    if (isNaN(value)){
        text="input not valid";
    }
    else{
        text="input ok";
        inputObject.value=value+1;
    }
    console.log(text);
}
```
